DETAILED ACTION

1. The amendment filed 01/16/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: “the delay between the first clock signal and the second signal is caused by an inverter circuit with a fanout of at least 2” as now recited in claim 1, lines 8-10”.

Applicant is required to cancel the new matter in the reply to this Office Action.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 and 4-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In particular, the specification does not provide support for the limitation that “the delay between the first clock signal and the second signal is caused by an inverter circuit with a fanout of at least 2” as now recited in claim 1.

Art Unit: 2193

4. Claims 1, 4-9 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation in claim 1 that “the delay between the first clock signal and the second signal is caused by an inverter circuit with a fanout of at least 2” appear to be misdescriptive as not being supported by the specification.

As per claim 27, it is indefinite as to which claim, claim 27 is a dependent of.

5. Claims 1,5 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Earle (3,340,388).

As claim 1, Earle discloses in figure 2 a circuit including a first 3:2 reducer and a second 3:2 reducer directly connected to the first 3:2 reducer, a first clock signal (32) connected to the first 3:2 reducer, a second clock signal (42) that is connected to the second 3:2 reducer. The second clock signal is the same as a clock signal that is half cycle delayed for the first clock signal as claimed.

As per claims 5 and 6, Earle also discloses two set-reset latches (39,40), and a symmetric carry generate gate (figure 44).

6. Claims 10-15,21-25,28-33 and 35-38 are allowed.

7. Applicant's arguments with respect to claims 1,4-9 and 27 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2193

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
